

NAGENDRA JADON

E-10 Goverdhan Colony Gole ka Mandir ◇ Gwalior, MP

nagendrajadon18@gmail.com ◇ <https://www.linkedin.com/in/nagendra-jadon> ◇ 8357973895

OBJECTIVE

DevOps Engineer with hands-on production experience in AWS cloud infrastructure, CI/CD pipeline automation, and Linux server management. Proven ability to own end-to-end deployments on AWS EC2, build Jenkins pipelines, configure Nginx/PM2 server environments, and migrate static assets to S3 + CloudFront CDN to improve performance and reduce costs. Passionate about infrastructure automation, system reliability, and cloud-native engineering. Actively pursuing AWS Solutions Architect Associate (SAA-C03) certification.

EDUCATION

Bachelor of Engineering, ITM UNIVERSE
Relevant Coursework: Computer Science Engineering

2016 - 2020

TECHNICAL SKILLS

Cloud & Infrastructure	AWS (EC2, S3, CloudFront CDN), Linux Server Administration, Nginx, PM2
CI/CD & Automation	Jenkins (pipeline design & automation), Docker (containerisation), Git, GitHub
Infrastructure as Code	Terraform (foundational knowledge)
Monitoring & Observability	Prometheus (metrics monitoring), Grafana (visualisation dashboards)
Scripting & Backend	Bash, Node.js, Express.js, REST APIs, JavaScript
Databases	SQL & MongoDB
Tools & Practices	Git, GitHub, Postman, Agile Development, Deployment Pipelines
Currently Learning	AWS Solutions Architect Associate (SAA-C03), Kubernetes (CKA path)

CORE COMPETENCIES

AWS EC2 • RDS & S3 & CloudFront CDN • Linux Server Admin • Nginx • PM2 • Jenkins CI/CD • Docker • Terraform • Prometheus • Grafana • Git & GitHub • Bash Scripting • Deployment Automation • Infrastructure as Code • AWS Lambda (Cloud Cost Optimisation) • Agile / Scrum

PROFESSIONAL EXPERIENCE

DevOps Engineer Wisdora Technologies Pvt Ltd	June 2025 - Present Gwalior, MP
- Owned end-to-end AWS EC2 deployments — provisioned and configured instances, managed production releases, and maintained application uptime across live environments. - Designed and implemented Jenkins CI/CD pipelines to automate build, test, and deployment workflows, eliminating manual deployment steps and reducing release time. - Configured Nginx as a reverse proxy and PM2 as a process manager for Node.js applications on Linux servers, ensuring high availability and zero-downtime restarts. - Led migration of all static assets from EC2 to S3 + CloudFront CDN — improving global page load performance and directly reducing monthly cloud infrastructure costs. - Managed Linux server environments: package installation, environment variable configuration, SSH access, and system monitoring. - Worked with containerization and CI/CD concepts using Docker and Jenkins, exploring automation of application deployments and environment setup. - Built a serverless automation solution using AWS Lambda (Python) and EventBridge Scheduler to dynamically resize EC2 instances on a defined schedule, optimizing compute costs by right-sizing infrastructure based on usage patterns. - Designed and deployed scheduled Lambda functions to automate instance type transitions (e.g., t3.medium ↔ t3.xlarge) for a production application, reducing manual intervention and ensuring resources scale with business hours.	

- Evaluated multiple AWS automation approaches (SSM Automation, Auto Scaling Group scheduled actions, Lambda + EventBridge) before selecting the most reliable serverless architecture, demonstrating strong judgment in AWS service selection under real-world constraints.
- Debugged and resolved automation failures in a multi-account AWS org environment, including diagnosing silent failures caused by Service Control Policy (SCP) restrictions — strengthening skills in AWS IAM, permissions boundaries, and cross-account troubleshooting.

Application Support:

- Developed and maintained Node.js/Express REST APIs and React.js frontend components, providing full-stack context for informed deployment and production debugging decisions.
- Collaborated in Agile sprints, code reviews, and cross-functional coordination to maintain delivery quality and velocity.

Technical Support

Dec 2024 –Jun 2025

Concentrix

Gurugram, HR

- Diagnosed and resolved technical incidents for end-users, developing systematic root-cause analysis skills directly applicable to production support.
- Documented recurring issues and resolution steps, reducing average resolution time and improving team knowledge base.
- Maintained composure and precision under pressure in a high-volume technical support environment.

Software Engineer

July 2021 –Dec 2021

Eastern Software Solutions Pvt Ltd

Noida, UP

- Managed code deployments using SVN (Subversion) on on-premise infrastructure for an enterprise ERP system, coordinating version control and release steps across development and production environments.
- Assisted in ERP installation, server environment configuration, and production debugging on on-premise servers, building foundational experience with infrastructure setup outside cloud environments.
- Optimised critical SQL queries for the ERP system, reducing execution times and improving overall system reliability and performance.
- Supported backend systems through performance analysis, environment troubleshooting, and collaborative debugging—early exposure to the deployment and infrastructure concerns that carry directly into DevOps work.

PROJECTS

DevOps Deployment Pipeline

- Containerised a full-stack Node.js application using Docker, ensuring consistent environments across development and production.
- Built a Jenkins CI/CD pipeline automating build, Docker image creation, and deployment to AWS EC2, achieving one-click releases.
- Provisioned cloud infrastructure using Terraform for repeatable, version-controlled environment setup.
- Integrated Prometheus and Grafana to monitor application health, resource usage, and configure alerting dashboards.

KEY STRENGTHS

- Cloud Deployment & Infrastructure Management (AWS EC2, S3, CloudFront).
- CI/CD Pipeline Design & Automation (Jenkins, Docker).
- Linux Server Configuration & Administration (Nginx, PM2, Bash).
- Strong Debugging, Root-Cause Analysis & Problem-Solving Skills.
- Ownership of End-to-End Deployment & Production Environments.
- Cost Optimisation & Performance Tuning in Cloud Infrastructure.

CAREER NOTE

From Dec 2021 to Nov 2024, I dedicated myself to preparing for competitive government examinations (SSC and related). I returned to the technology industry in Dec 2024 and have since been fully focused on building a DevOps and Cloud Engineering career with hands-on production experience.
